THE CAMPUS

# The University of Maine

A Public Institution Maintained by the State and  
General Government

## Undergraduate Courses

are: Classical, Latin-Scientific, Scientific, Chemical, Agricultural, Preparatory Medical; Civil, Mechanical and Electrical Engineering; Pharmacy (4 years), Pharmacy (2 years); Short and special Courses in Agriculture; Military Drill.

## Expenses

for university fees, board and rooms, \$176.50. Loans covering tuition, are provided for needy students. A new dormitory for women. Rooms in the dormitories are free.

## The School of Law,

at Bangor, offers a course of three years. The tuition charge is \$60. Three resident, and six other instructors.

## The Faculty

includes 52 names; students number 355.

## The Equipment

includes 18 buildings large and small, 9 well equipped laboratories, the museum, the herbarium, the shops, and library.

For illustrated catalogue, and circulars, address

**A. W. HARRIS, President, Orono, Me.**

# For Students' Rooms

# THE CAMPUS

Vol. II.

ORONO, ME., DECEMBER 1, 1900.

No. 5

## THE CAMPUS

Published on the first and fifteenth of each month during the college year by the students of the University of Maine.

### EDITORIAL STAFF.

#### MANAGING EDITOR.

FRED H. H. BOGART, 1901.

#### ASSOCIATE EDITORS.

MARK J. BARTLETT, 1901.

ALSON H. ROBINSON, 1901.

SAMUEL D. THOMPSON, 1901.

FRANK W. KALLOM, 1902.

ALVIN M. WATSON, 1902.

RALPH M. CONNOR, 1903.

SANFORD C. DINSMORE, 1903.

JOHN H. HILLIARD, 1903.

### BUSINESS STAFF.

WALES R. BARTLETT, 1901, - - Business Mgr.  
P. EDWARD MCCARTHY, 1902, Asst. Business Mgr.

Terms: \$1.50 per year, strictly in advance; single copies 10 cents.

Address all business communications and make all checks payable to W. R. Bartlett, Business Manager, Orono, Me.

Contributions from undergraduates and alumni are earnestly solicited. They should be addressed to the Managing Editor.

Entered at the Post Office at Orono, Me., as second-class mail matter.

PRINTED BY J. P. BASS & Co.

## STUDENTS' DIRECTORY.

TRAINS—Leave Orono for Bangor at 6.46, 8.57, 9.57, 10.52, A.M.; 12.45, 1.42, 2.52, 4.02, 7.12 P.M.

Leave Orono for points north of Old Town at 7.21 A.M.; 2.28, 5.04, 6.53 P.M.

Leave Bangor for Orono at 4.35, 7.00, 8.30, 11.30 A.M.; 1.15, 2.05, 2.50, 4.00, 4.45, 5.30, 6.30, 11.05 P.M.

Leave Bangor for the south and west at 7.15 A.M.; 1.35, 8.09, 11.45 P.M.

Leave Bangor for Bar Harbor at 6.00, 9.30 A.M.; 4.50 P.M.

ELECTRICS—Cars leave Bangor at 5.30 A.M. and each half hour thereafter until 9.00 P.M.; after 9.00 P.M. on even hours until 11.00 P.M. Cars arrive at U. of M. fifty minutes after leaving Bangor. Cars pass the campus

going north, 10m. of and 20m. past the hour; going south, 20m. of and 10 m. past the hour.

MAILS—Leave Orono for points south and west at 6.30 A.M.; 12.40, 6.40 P.M. For points north at 6.30 A.M.; 2.10 P.M. Arrive at Orono from points south and west at 7.40 A.M.; 5.30, 7.10 P.M. From points north at 1.10, 7.10 P.M.

The boats of the Boston & Bangor S. S. Co. leave Bangor for Boston, stopping at Rockland and intermediate landings, on Mondays, Wednesdays, Thursdays and Saturdays at 11.00 A.M.

The college library is open from 8.00 to 12.00 A.M. and from 1.30 to 5.30 P.M.

The college office is open from 8.00 to 12.00 A.M., also from 1.30 to 5.00 P.M., but only matters of special importance should be submitted during the latter hours.

## EDITORIALS.

THE sad accident at the Technology cane-rush two weeks ago has attracted attention to rushes of similar kinds in all colleges. Our grand-stand scrap is not so dangerous and certainly does not offer so many chances of injury. Yet restrictions are needed as anyone who ever witnessed one of them will admit, and after the warning that each college has received by the death of one of the contestants in such a scrap, it seems probable that either the faculty or students will make such restrictions before next fall.

THE Colby Echo of Nov. 15 contains an editorial upon the unsatisfactory condition of intercollegiate athletics in Maine in which it urges the formation of an advisory alumni council.

We presume that this has in mind the proposition made some three years ago that such a body be formed to be composed of one representative to be elected by the athletic association of each of the four Maine colleges, a

graduate of at least five years' standing, and having no official connection with his college; that all differences which arose should be referred to this council for settlement, and that its decision should be final.

Such a body could pass upon the eligibility of players, arrange for satisfactory officials for all contests, and settle any other matters over which controversies might arise that the parties would wish to have settled. In some cases it might not regard it as best to act itself, but could arrange for differences to be submitted to arbitration by competent and entirely disinterested persons.

It may be that some better scheme than this can be suggested, but none has. This being the case, why not give it a fair trial? It is certain that the conditions which exist are discreditable to college men who ought to stand for pure and fair athletics, and any method that can hope to prevent the recurrence of the bitter controversies of the last few years should be tried unless a better one can be suggested.

The University of Maine Athletic Association has for three years had a representative elected, Mr. W. R. Howard, '82, Belfast, who was authorized to represent it in such an organization. It seems from the editorial in the *Echo* that Colby is now ready to join in the movement. Will not Bowdoin and Bates do the same? If not, then let the representative of Colby meet Mr. Howard and have the two men arrange for regulating the contests between the teams of the two institutions, and provide for settling promptly any controversies which may arise, and without the friction that comes from the haphazard methods now in vogue.

THE Hartford Times in commenting on the recent Trinity-Wesleyan game says in part: "One instance of sportsmanlike conduct on the part of the Wesleyan captain ought to be recorded. Capt. Dodds of Wes-

leyan was on the ground when Johnson of Wesleyan tripped and fell on him though the ball was not in Dodds' hand. The umpire promptly disqualified Johnson for "unnecessary violence," but Dodds immediately protested that it was not Johnson's fault and the umpire changed his decision. This was in the second half when it was very important to get rid of Johnson. Dodds' conduct strikes us as about as square and chivalrous an action as the annals of the sport can show and is more credit to the college than winning a dozen victories would be."

If the above act is to go on record as a most praiseworthy act, and we most certainly believe that it should, beside it should be placed the act of Capt. Gregson in the Bowdoin-U. of M. game Saturday. Early in the game when "Maine's" strength was still an uncertain factor, Taylor opened an old wound on his forehead and it became necessary to bandage it. The time limit was soon exceeded, and some of the opposing team began to protest that another man should be substituted and the game resumed. But Capt. Gregson said, "No, give them time to fix him up," and after a delay of four minutes Taylor was "fixed" and the game went on. Such acts as these are only small things, of course, but they help wonderfully to take away the bitterness of defeat, and to further that most desirable of all things in college athletics, a distaste for everything unsportsmanlike or unfair.

THE attention of THE CAMPUS was recently called to the conditions of the fire department at this university. After a little investigation and serious thought upon this subject, we feel really alarmed at the present conditions and their possible consequences. In case of fire, how many of the students who live in Oak Hall or the fraternity houses situated on the campus would know where the hose cart or hook and ladder truck

are k

are kept? Grant that some one has happened to notice, and has presence of mind to think of it at such a time, that the hose cart was in the basement of Coburn Hall; how could he get it out? The door is locked. Either the janitor must be found or the door broken in. If the door is opened, who knows just where the nearest hydrant is, how to couple the hose and direct the stream? All these things require time, even in the brightest day, for the novice. Imagine then the result on a dark, stormy night. In case of emergency, who knows how to get out the hook and ladder truck and run its ladders to the fourth story of Oak Hall quickly and advantageously?

At present the truck is kept in the gymnasium; the door is locked, the wheels of the truck are locked; who, then, students or university authorities, would be responsible for the loss of life and property, which might occur through the simple inability to get the necessary apparatus at work in the shortest possible space of time?

These are simply some of the thoughts which have arisen as THE CAMPUS has considered the subject. The conditions certainly demand some action. What shall it be? Notices should be posted stating where the apparatus is kept, how to get it out in case of fire, and where the hydrants are situated. A fire company should be organized and drilled, so that in case of fire experienced hands could direct the work. Who is capable of doing it now?

NOT long since Dr. Harris gave a short talk after chapel upon the advantages to be derived both by students and university from the work of the Glee and instrumental clubs. This advice has been heeded by some and a fair prospect of success seems to be assured. As the football season has come to a close and the attention that has been centered upon that has to turn to some other

object, THE CAMPUS wishes to urge upon every student of the university the importance of the musical clubs.

Plans are being made to make a trip during the Christmas vacation and in order for the clubs to meet the success that the last year's clubs met, it is necessary that every man of musical talent should turn out. We wish to urge those who have been too busy with football to give any time to the clubs to begin at once to attend the rehearsals. The success that the clubs gained last year was an honor to the men and to the institution. Perhaps nothing else in college life brings the eyes of the public more upon the work and character of the university than do these clubs.

Last year the clubs made three trips. This year a fourth one is planned through the western and northwestern part of the state. The student body cannot appreciate what this trip will mean to the university. It is surprising to perceive how little the people in that part of the state know concerning the University of Maine and these trips cannot fail to promote her interests in such sections. In order to do this it is necessary that more men should turn out for rehearsals and aid in every way in making the club a success. Rehearsals are held twice each week and Prof. Harrington is present as director. The notices for rehearsals are posted upon bulletin boards and in the future we hope to see a greater manifestation of interest on the part of the student body in the success and welfare of two such purely representative organizations as are these.

The annual meeting of the board of trustees was held Tuesday and Wednesday, November 20 and 21. The trustees, accompanied by President Harris, made an inspection of the buildings including the new gym. Among the business transacted it was voted not to move the law school to Orono.

How much did you make on the Yale-Harvard game?

Miss Geneva Hamilton, assistant in the library, has returned from a short visit in Sangerville.

Laura M. Preble of Lee is taking a special course in civics and literature.

"Five or six quiet, industrious U. of M. students can get board and rooms at Spearens Hall."—Bangor News.

The faculty extended the Thanksgiving recess from Wednesday noon to Monday noon.

Livermore, '04, has recovered from a severe attack of the measles. He was attended by Dr. Sanger of Bangor.

Sunday afternoon, Nov. 18, Rev. A. E. Kingsley of Bangor gave a very interesting address in the chapel. This was the first of a series of Sunday afternoon services that will be held this winter under the auspices of the Y. M. C. A.

In speaking of turning out a crowd of Tufts students to attend their Tech game in Boston, Nov. 10, the Tufts Weekly has the following: "We *must* have a crowd. Just meditate on the fact that when the University of Maine played Colby, October 27, in Waterville, two hundred U. of M. men made the hundred-and-twenty mile trip in a special train, decorated with the university colors. And a large delegation of the co-eds went, too."

A short time ago one of the steel roof trusses which was not properly guyed came tearing down. It struck the floor and went through it for nearly twenty feet. One of the workmen narrowly escaped being injured.

Maj. and Mrs. Edgerley were in Bangor about two weeks ago. Maj. Edgerley was at one time military instructor at this university. He has been with his regiment at the Columbia barracks in Cuba the past year and will report for duty again after thirty days leave of absence to this country.

Dr. and Mrs. Harris tendered a reception to the faculty Tuesday evening, Nov. 20. Several members of the board of trustees were present.

Bogart, '01, who has been confined to his room for two weeks on account of the measles, has left for his home in Connecticut where he will remain until after the Christmas recess.

All the railroads granted half fare rates to the students wishing to spend Thanksgiving at home.

The first number of "The University of Maine Studies" has been received from the printers. This number is devoted to an article entitled "The Effect of Magnetization Upon the Elasticity of Rods" by Prof. Stevens.

G. O. Small, 1903, fractured his collar bone in the sophomore-freshman game.

F. E. Watts, '01, has returned to his home in West Falmouth on account of an attack of the measles.

At a meeting of the junior class, held Nov. 19, Miss Rice resigned as secretary and H. C. French was elected in her place. A committee consisting of a man from each fraternity was appointed to circulate a paper for subscriptions for the next football season.

F. H. Hunt, '04, has been obliged to return to his home in Thorndike on account of illness.

L. C. Bradford, '03, will not return to college until after the Christmas recess.

L. G. Varney, '01, and G. H. Davis, '01, recently attended the National Conclave of Kappa Sigma at Philadelphia, where they were sent as delegates from Psi Chapter.

Luther Peck, '02, has been elected manager of next year's football team.

At a meeting of the sophomore class held recently, it was voted to circulate a paper asking each member to pledge himself to support the athletic association to the extent of \$5 during the fall of 1901. About fifty signed the paper. Similar papers have been circulated among the senior and freshman classes.

A meeting of the Mathematical and Physical section of the Scientific Association was held Thursday evening, Nov. 22, when the following program was carried out:

Meteorology as Taken in High Schools..

Miss Knowles.

A Problem in Analytic Geometry.....

Mr. Porter.

Proof of Addition Theorem in Projective Methods .....

Mr. Siff.

The latest victim to the measles is Simpson, '03, at the Beta House.

The Phi Gamma Delta House was the scene of a pleasant social gathering on the evening of Friday, Nov. 16. Dancing was enjoyed and refreshments were served.

An interesting football game took place on the campus on Saturday morning, Nov. 10, between the sophomores and freshmen of the Phi Gamma Delta House, resulting in a score of 6 to 6. The score, however, does not show everything. It was conceded by all that the playing of the sophomores was much superior to that of the freshmen and they were only prevented from making another touchdown by an unfair decision of the referee.

The equipment of the steam heating and power system has been improved lately by the addition of a "National" feed-water heater manufactured by the National Pipe Bending Co. of New Haven, Conn., and a "Bundy" oil separator manufactured by A. A. Griffin Iron Works, New York. The heating system for

Oak Hall was greatly improved during the summer, one of the things being an arrangement of piping whereby the exhaust steam of the Corliss engine can be used for heating the hall in moderately cold weather. It is expected that this will greatly decrease the cost of heat for that building.

At the meeting of the students of Cumberland county, held on Tuesday, Nov. 6, it was decided to organize a Cumberland County Club for the purpose of increasing the interest of the students from that section of the state, in the college. After a free discussion of the advantages of such an organization, a committee was appointed to draw up a constitution.

### MT. VERNON NEWS.

On Friday evening, Nov. 23, an enjoyable party was given at the Mt. Vernon house by the Phi Gamma society. Tables were placed in the rooms belonging to the Art Guild and whist was indulged in by many. Those who preferred to pass the time in dancing found the reception room and dining room admirably adapted for that purpose. A short reception was held the first part of the evening, the reception committee consisting of Miss Fraser, president of the Phi Gamma society; Mrs. Knights, Mrs. Briggs and Mrs. Belcher. The committee of arrangements consisted of Miss Knowles, Miss Hinckley and Miss Maxfield.

On Monday, Nov. 18, after their regular meeting, the trustees dined at the Mount Vernon house.

On Nov. 21 the regular monthly meeting of the Art Guild was held at the Mount Vernon house. A very enjoyable program, beginning with a piano solo by Miss Weston, was rendered. This was followed by an illustrated lecture on Venice by Prof. Rogers. The audience was carried along the Grand canal, by the Ducal Palace and the House of Gold, stopping

to examine the interior of St. Mark's Cathedral and other points of interest, and back again to the starting place in a highly interesting way. The pictures were very clear and being admirably explained made the lecture most pleasurable.

The program was concluded by a piano solo by Miss Weston which was highly appreciated. The Art Guild has now a very interesting collection of casts among the most notable being a statue of Venus de Milo, a bust of Hermes which was the gift of Mr. Webster, and a portion of the Parthenon frieze and a medallion of Homer. Several pictures have also been added to the collection which was begun last year among them being some of the works of Raphael and of Michael Angelo. The whole collection, both of pictures and casts, is one everyone should endeavor to see and reflects great credit on Professor Huddleston for his enthusiastic and zealous endeavor.

### THE PEANUT SCRAP.

One of the fiercest rushes ever seen on the campus occurred early Friday afternoon, November sixteenth. The freshmen had been anticipating how great would be their pleasure when they should cast their eyes on those three bushels of peanuts which they had won in the annual ball game with the sophomores. Two freshmen discovered where the sophomore manager had placed their prize. Now comes the tale of woe. In the small hours of the morning, these two freshmen lifted the huge bag and conveyed them to a safe hiding place.

Throughout Friday forenoon, knowing glances were exchanged among the freshmen class and small knots of the members were to be seen conversing in a cautious manner, and yet the sophomores did not suspect. At one o'clock the freshmen assembled in class meeting, bringing the peanuts from their hiding

place and, as nearly as possible, divided them equally among the members. There were a few quarts left, however, and those in a bag were thrown from a window and were immediately grabbed by a freshman. He started on the dead run for the Beta house, but when nearly there he was attacked by two sophomores and then the scrap began. Scores of both freshmen and sophomores came pouring over the campus and soon the burlap with a few peanuts in it was surrounded by at least a hundred struggling sophomores and freshmen. The scrap lasted more than an hour and the crowd surged across the lawn on to the Beta tennis-court and finally over the railroad track into the bushes near the river.

Apart from the main struggle there were minor scraps where freshman and sophomore were locked in deadly embrace. Finally the scrap was declared off and hands were counted on the burlap which was now not much more than a string. The sophomores won and returned to the campus as victors, but the freshmen had most of the peanuts.

### U. OF M. STUDIES.

The first volume of the University of Maine Studies was issued this week and promises very much for the future of this new magazine. No. 1 is entirely devoted to an article embodying the results of a series of experiments carried on in the laboratories of this university by Prof. Stevens and assistants, to determine the effect of magnetization upon the elasticity of rods. Much of the matter contained in this first issue has appeared from time to time in the Physical Review and, through the courtesy of this magazine, the "Studies" contain a very complete set of illustrations of the various pieces of apparatus used. The most notable

feature of the apparatus is the employment of an interferometer as a means of measuring the deflection of the rods. It is due, in fact, to the use of the interference fringes as a means of measurement that the results recorded in the article, are of so much more value than any work that has previously been done along this line. Not only was the theory verified that magnetization affected the value of the modulus of elasticity, but very accurate measurements were made of the change accompanying the magnetization, where the rods submitted to the tests were under conditions of flexion, torsion and traction. Something of the difficulties encountered in the work may be gleaned from the statement that it was found necessary to perform the tests in a basement laboratory with the apparatus mounted upon a stone foundation entirely separated from the foundation of the building. So sensitive was the interferometer to slight jars that the striking of a clock, four stories above, would cause a perceptible vibration of the fringes.

Judging from the issue of the "Studies" which is already published and from the plans which the editors have for future numbers, it would seem that the magazine would very shortly make a place for itself in the field which it has so recently entered. No attempt will be made to bring it out regularly but each issue will contain a single article which shall contain the results of original research or investigation by some man connected with the university. Nothing, according to the present purpose of the editors, will be published which shall not add to the knowledge of the world along the line of which it treats and if this purpose is carried out, the U. of M. "Studies" will without a doubt become a great honor to the university.

Ithaca, N. Y., Nov. 21, 1900.

Editor-in-Chief of Campus:

Dear Sir: I have just received and read the Nov. 15th issue of THE CAMPUS, and wish to express to you and to your associates the pleasure it gives me to receive such a record of the life at the U. of M. After eight years spent at the university it has become more than my Alma Mater to me, and for its welfare I shall always hold the deepest regard. What it has done for me it is now doing for many others, and I believe, with the editors, that the members of the student body can be aided in appreciating their advantages and helped in their work by words of appreciation from alumni for similar advantages enjoyed by themselves in previous years.

As a graduate student at Cornell I find many things that are different from the U. of M., some desirably so, some otherwise. The spirit of the university gives a powerful incentive to work, and the management finds no difficulty in affording one abundant opportunity for the gratification of such a desire, be he undergraduate or graduate, nor does it always wait for the outspoken wish of the candidate. As I look at the great amount of equipment for all lines of work, I often wish that "Maine" might have something like it. Student life and interests cannot be said to differ greatly, however. In work and in athletics, much the same spirit is shown. At present all are looking forward with much interest to the final and great event of the football season, the annual game with the University of Pennsylvania, to be played on Thanksgiving day at Philadelphia. After defeating Princeton so easily a few weeks ago, Cornell's chances for winning from

U. of P. seemed good, but the recent defeat at the hands of Lafayette changed the prospect considerably.

I have watched "Maine's" football record this fall with much interest, and believe that, although defeats have come oftener than victories, the year's work will prove to be one of value and a step onward. I am glad to learn that steps are being taken to secure a thoroughly efficient coach for next season. What is wanted is a systematic course of training to develop some definite style of play, and with that end the spirit shown this year the future history of the U. of M. in football will be written in different colors than heretofore.

Among other interests at "Maine" I am glad to see that the Junior Electrical and Mechanical Society is continuing its work. The good coming from such organizations cannot be estimated.

Hoping for the continued prosperity of the university in all departments, and especially for THE CAMPUS, I am,

Very truly,

P. Walker, '96.

A letter from R. H. Rockwood, who is at present a surveyor in the employ of the Mantoulin and North Shore Railway, running into the Hudson Bay region, was printed in the Nov. 6 issue of the Waterville Mail. The letter contains a most interesting account of the daily life of an engineer, and the many peculiar conditions which have to be met in that northern latitude. In commenting upon some peculiar traits exhibited by the people in that section, he writes: "One thing which I have often noticed in this country is the admiration of the people for the Americans and their business methods. An old clerk in the employ of the contractors told me one day with a great deal of pleasure about how the timber lands about Sudbury came to be opened up. A party of Americans came out, looked the ground over, and when winter came, sent in crews of men, cut

the timber and rafted it out without as much as saying, 'by your leave,' to anyone. The crown timber agents thought to prevent a repetition of the deed but the next winter, the same thing happened again. This resulted in the awakening of the people to the fact that there was valuable timber in the country. Any venture that the Americans embark upon the natives seem to think is sure to succeed, while they say their own people are too conservative to get ahead."

'76.

Hon. William T. Haines of Waterville attended the annual meeting of the trustees November twentieth and twenty-first.

EX '84.

W. R. Pattangall of Machias, who is one of the leading attorneys of eastern Maine, is a prominent candidate for the position of United States district attorney for the state of Maine to succeed Hon. Isaac W. Dyer of Portland whose term of office expires next year.

'91.

Joseph Colburn Graves will be married December seventh to Bertha E. Rundio at her home in South Orange, N. J. Mr. Graves has an excellent position with the Otis Elevator company in New York city.

'92.

Robert H. Fernald, who is assistant professor of mechanical engineer at the Case School of Applied Science at Cleveland, Ohio, has been granted a leave of absence for one year. Prof. Fernald has recently received a fellowship at Columbia university and is now pursuing his work at that place.

'98.

Gracia L. Fernandez, who through illness was forced to resign her position as instructor in the Beneficencia at San Juan, Porto Rico, and remove to a dry climate, is now principal of the Tule Grammar School at Tule, Arizona.

The population being entirely Mexican, the pupils are Spanish—speaking and the instruction is necessarily in both English and Spanish.

Ralph Hamlin is employed as draughtsman with the Pennsylvania Steel Company at Harrisburg, Penn.

Ex-'98.

Albro S. Burnell, who graduated from Bowdoin college last June, is reading law in Portland.

Homer E. Marks visited friends on the campus recently on his return from a hunting trip in the northern part of the state.

Ex-1901.

A. R. Peaks has been elected registrar of probate in Piscataquis county.

A. F. Brown was on the campus recently. At present he is at his home in Belfast.

## THE UNIVERSITY OF MAINE AND THE EXPERIMENT STATION.

Few even among those most familiar with the work of this institution realize how largely the experiment stations of this country have drawn upon the graduates of the Main State College and the University of Maine. The list of station workers here presented, while it does not profess to be complete, will be of interest:

F. Lamson Scribner, '73. Botanist at the Tennessee experiment station. Now agrostologist in the U. S. Department of Agriculture.

Walter Balentine, '74. One of the managers of the Maine station in the early years of its existence and for a time acting director. From 1885 until his death in 1894 in charge of the department of experimental agriculture.

W. H. Jordan, '75. Director of the Maine station from 1885 to 1896, when he resigned

to take the directorship of the New York (Geneva) station, one of the most important positions of the kind in this country.

J. M. Bartlett, '80. Chemist at the Maine station since its organization in 1885.

E. H. Farrington, '81. For some years chemist at the Connecticut station. In 1893 he resigned to take a position at the Wisconsin station, where he now has charge of the department of dairy husbandry.

F. E. Emery, '83. From 1892 to 1899 agriculturist at the North Carolina station. Now at Biltmore.

L. H. Merrill, '83. Chemist at the Maine station since 1886.

F. E. Ladd, '84. For a time chemist at the New York (Geneva) station. For the past eight or nine years chemist at the North Dakota station.

H. T. Fernald, '85. Associate entomologist at the Massachusetts station.

F. L. Russell, '85. Veterinarian at the Maine station since 1888.

S. S. Twombly, '86. Consulting veterinarian at the Utah station for some years.

D. W. Colby, '87. For a time chemist at the Vermont station.

N. E. Wilson, '88. Superintendent of dairying at the Vermont station. Since 1891 chemist at the Nevada station.

F. P. Briggs, '89. For five years assistant in botany and entomology at the Maine station.

S. H. T. Hayes, '90. In 1896 assistant in dairy laboratory, New York (Ithaca) station.

F. C. Moulton, '91. In 1895 assistant chemist at the Maine station.

H. P. Gould, '93. For four years assistant in horticulture at the Maine station. Now assistant entomologist at the Maryland station.

A. T. Jordan, '93. Assistant horticulturist, New Jersey state station.

O. W. Knight, '95. Assistant chemist at the Maine station since 1896.

L. A. Rogers, '96. Assistant in bacteriology, New York (Geneva) station.

A. J. Patten, '97. For three years assistant at the Maine station. Now assistant chemist at the New York (Geneva) station.

A. L. White, '98. Assistant chemist, Maine station. Now at the University of Vermont.

E. R. Mansfield, '99. Assistant chemist at the Maine station since graduation.

C. D. Holley, '00. Assistant chemist at the Maine station since graduation.

Of this list of twenty-four names, fifteen are still engaged in experiment station work. When it is remembered that the staff of the Maine station includes but eleven men, it will be seen that the University of Maine has no cause to be ashamed of her contribution.

#### ACQUISITIONS OF THE ART GUILD.

One of the most important features of the Art Guild and one which is perhaps unknown to many is the recent acquisitions. On entering the reception room the visitor finds himself in the sixteenth century. Here are hung the works of the most important masters of that period, Raphael and Michael Angelo. Among them are the reproduction of the ceiling of the beautiful Sistine chapel, the "Last Judgment," by Angelo, and the group of four of Raphael, representing Love, Music, History and Philosophy.

On entering the adjoining room the nucleus of the future gallery of casts is brought to view, and in the next works pertaining to the fifteenth century. The casts are worthy of special attention. Most prominent of all is a beautiful little statue of Venus de Milo standing alone in its glory. On one wall hangs a section of the Parthenon frieze, a Bacchante, and one of Delle Robbia's Bombinos. On another wall is a large cast of "Victory Tying Her Sandal," and a medallion of "Homer." A "Mourning Athena" is also among the collection.

Besides the above, which have been purchased during the summer by Prof. Huddils-

ton, there has been presented to the Guild by Mr. Webster, of Orono, a beautiful bust of Hermes which has been given a prominent place in the room which contains the casts. The entire collection is one worthy of notice and should be seen by all who are interested in art. It reflects great credit upon Prof. Huddilston, through whose energetic efforts it was obtained.

#### THE NEW OBSERVATORY.

The work of mounting the large telescope in the observatory having been completed, the equipment of this valuable addition to the astronomical department is finished, making by far the most efficient astronomical laboratory in Maine. The observatory is a very small building but it is admirably adapted to the purpose for which it was designed. In the main portion of the structure,—which is a room fourteen feet square and eight feet high surmounted by a dome of six feet radius,—is placed the new telescope. It was manufactured expressly for the university by Alvan Clark & Sons, of Cambridgeport, Mass., and has an eight inch objective. In front of the main room is a small ell in which is mounted a vertical circle, with one and eight-tenths inch objective, manufactured by Rebsold & Sons, Hamburg, Ger. This instrument is used for instructing students in the methods of determining time, and latitude and longitude. Besides these instruments there is included in the equipment a siderial chronometer and two sextants. For the present the observatory will be used only for classroom work in descriptive astronomy. In the near future it will without doubt be used by Prof. Hart in carrying out some line of special astronomical investigation, although a definite program has not as yet been laid out. Very few of the smaller colleges have instruments to compare with the telescope which has just been mounted here, and it is not too much to expect that valuable work will be accomplished through its means within a short time.

## ATHLETICS.

Although the football season ended with the Bowdoin game, yet the students have had some excitement in witnessing two games on the campus since that time. The first was a contest between the Kentucky Taylors and the Pearsons, representing the second and third floors of Oak Hall, respectively. The second game was between the sophomores and freshmen, which was hotly contested as the score will show.

## PEARSONS, 17; KENTUCKY TAYLORS, 5.

Saturday, Nov. 17th, saw the Pearsons conquer the Kentucky Taylors in a closely contested game on the university gridiron. Before the game both teams were confident of victory but the Kentucky Taylors were easily out-played and consequently "Captain Batch" came off the field with a smiling countenance.

The line up:

Pearsons.	Kentucky Taylors.
White, r. e. ....	l. e., McFadyen
Snell, r. t. ....	l. t., R. C. Davis
E. J. Bartlett, r. g. ....	l. g., W. R. Bartlett
Sheahan, c. ....	c., Murphy
French, l. g. ....	r. g., Nickerson
Lewis, l. t. ....	r. t., Tucker
Silver, l. e. ....	r. e., Holmes
Baker, q. b. ....	q. b., Libby
Norwood, l. h. b. ....	r. h. b., F. M. Davis
Blaisdell, r. h. b. ....	l. h. b., Strickland
Batcheldor, f. b. ....	f. b., Faunce

Score, Pearsons, 17; Kentucky Taylors, 5. Touchdowns, Norwood, Blaisdell, Batcheldor, Murphy. Goals from touchdowns, Batcheldor, 2. Referee, G. H. Hadlock. Umpire, S. D. Thompson. Linesmen, W. C. Elliot and M. C. Wiley. Time, 15 and 10 minute halves.

## SOPHOMORES, 6; FRESHMEN, 5.

The sophomores defeated the freshmen Saturday, the 24th, in one of the hottest and most closely contested class games that was ever seen on the campus. The honors were about evenly divided but many think that the freshmen had a little the best of the contest. Surely they surprised everybody in the quick,

snappy game that they played and the way that they stopped the fierce line bucking of Dorticos and Bradford. Taylor, Bean and Sawyer were the stars of the freshman team and it was seldom that the opponents gained through these men. Dorticos, Harris and Bradford put up the best game for their team.

The sophomores kicked off at the beginning of the game and the freshmen started in with a firm determination. They gained twenty yards and then lost the ball on downs, but immediately got it back again. Again they lost it on downs and again they held on their fifteen yard line. Sawyer made ten yards but fumbled. On the next play Dorticos fumbled, Leighton got the ball and ran to the sophomores' forty yard line before he was downed. Sawyer made five but Wiley got the ball on the next play through a fumble. The freshmen held for downs after Dorticos and Bradford had made five each. The freshmen fumbled and then Taylor got the ball on another fumble. Taylor made eight and Parker two. Time was called for the first half with the ball in the freshmen's possession on their opponents' fifteen yard line.

The line up:

Sophomores.	Freshmen.
Hadlock, l. e. ....	r. e., Bean
Jordan, l. t. ....	r. t., Leighton
Strickland, l. g. ....	r. g., White
Larrabee, c. ....	c., Ricker
Goodwin, r. g. ....	l. g., E. W. Taylor
Towse, r. t. ....	l. t., Sawyer
Norwood, r. e. ....	l. e., Soderstrom
Harris, q. b. ....	q. b., Eastman
Bradford, l. h. b. ....	r. h. b., A. G. Taylor
Wiley, r. h. b. ....	l. h. b., Parker
Dorticos, f. b. ....	f. b., Talbot

Score, Sophomores, 6; Freshmen, 5. Touchdowns, Towse, Taylor; goal from touchdown, Dorticos. Referee and Umpire, Beck. Umpire and Referee, Wormell. Linesmen, Delano and Montgomery. Timekeepers, Ross and Fitz. Time, 20 and 15 minute halves.

Following is the all-Maine team as made up by the Bangor Daily News:

Moody, Bates, right end.  
Hill, Bowdoin, right tackle.  
Baldwin, Bates, right guard.  
Bodwell, Bowdoin, centre.  
Cloudman, Bowdoin, left guard.

Hamilton, Bowdoin, or Dunlap, Bowdoin, left tackle.

Haggerty, Colby, left end.

Pratt, Bowdoin, quarterback.

Hunt, Bowdoin, or Davis, Maine, right half.

Gregson, Bowdoin, left half.

Dorticos, fullback.

It may be interesting to look over the scores of the four Maine colleges. The following is the order in which the Kennebec Journal places the four teams and it seems to be the correct arrangement:

## BOWDOIN.

Bowdoin,	32	N. H. State,	0
"	0	Harvard,	12
